Lab Task-2:

1. Write a program to determine whether the Given Input is Operator or Not and show number of operators.
   e.g. input-> 2+3=5
   output:
   operator1 : +
   operator2: =
   number of operators = 2

2. Write a program to determine whether the Given Input is Comment line(s) or Not. DO not use more than 2 'if' statement.
   e.g. input-> //abc
   output: This is a single line comment.

   e.g. input-> /abc
   output: This is not a comment.

   e.g. input-> /*abc*/
   output: This is a multi line comment.

   e.g. input-> /*abc/
   output: This is not a comment.

   e.g. input-> /*/
   output: This is not a comment.
